### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leslie Henry on 30 November 2004.

The application has been amended as follows:

The claims withdrawn from consideration have been rejoined since a generic claim was found to be allowable.

In claim 61, "(IFN- $\beta$ )" was replaced by --(hIFN- $\beta$ )--. "40 mM" was replaced by --20 mM--.

In claim 62, "rhIFN- $\beta$ " was replaced by --hIFN- $\beta$ --.

In claim 75, "(IFN- $\beta$ )" was replaced by --(hIFN- $\beta$ )--. "40 mM" was replaced by --20 mM--.

In claim 76, "rhIFN- $\beta$ " was replaced by --hIFN- $\beta$ --.

The following is an examiner's statement of reasons for allowance: The calculations provided by Applicant indicate that the final ionic strength of the composition taught by the Hershenson patent is at least 44.23 mM. While the ionic strength taught by the patent need not be the preferred embodiment in order to anticipate the instant claims, what is disclosed in column

4 are buffer concentrations, not final ionic strengths. Hershenson does not teach final ionic strengths other than as calculated by Applicant.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
